We are on a mission. A mission to provide digital equality across the UK, with access to technology to make lives better. No matter what the circumstances, we want to help deliver efficient, durable, affordable access to the digital world, prioritising those most in need.

The **Tactus GeoBook** is the ideal solution to help aid digital poverty in the UK. As the world moves online, it can give vulnerable people the tools to connect. Technology can provide access to healthcare including mental health support, financial advice and management such as online banking and a network of tools for jobseekers.

XMA have invested heavily to make technology more accessible to citizens that need it most.
